1)Dr. Neelam Yadav

Address of Applicant :Department of Linguistics, K.M. Institute of Hindi and Linguistics, Dr. B.R. Ambedkar University, Agra-282004 (India) -----

2)Dr. Ashutosh Kumar

Name of Applicant : NA
Address of Applicant : NA

(72)Name of Inventor :

1)Dr. Neelam Yadav

Address of Applicant :Department of Linguistics, K.M. Institute of Hindi and Linguistics, Dr. B.R. Ambedkar University, Agra-282004 (India) -----

2)Dr. Ashutosh Kumar

Address of Applicant :Faculty in Languages, Himachal Pradesh University Department of Evening Studies, The Mall, Shimla-171001 (India) -----

(57) Abstract :

ABSTRACT: The integration of digital technology into language learning has revolutionized the way individuals acquire new languages. A System and Method for Language Learning Through Digital Technology represents an innovative approach that harnesses the power of technology to offer personalized, adaptive, and engaging language learning experiences. These digital systems encompass platforms, content libraries, gamification, personalization, assessment tools, and virtual tutors, all working cohesively to facilitate language acquisition. The consequences for applied linguistics are profound, as these systems generate vast amounts of data for research, allowing linguists to gain insights into language acquisition processes, pedagogical innovation, and learner motivation. Moreover, they offer the opportunity for collaboration between linguists and technology developers, ensuring that language learning methods align with sound linguistic principles. This convergence between technology and linguistics holds the potential to enhance language education and advance the field of applied linguistics.
