Proposed Year wise Structure of UG Program in History

History is the analysis and interpretation of the human past enabling us to study continuity and changes that are taking place over time. It is an act of both investigation and imagination that seeks to explain how people have changed over time. Historians use all forms of evidence to examine, interpret, revisit, and reinterpret the past. These include not just written documents, but also oral communication and objects such as buildings, artifacts, photographs, and paintings. Historians are trained in the methods of discovering and evaluating these sources and the challenging task of making historical sense out of them. History is a means to understand the past and present. The different interpretations of the past allow us to see the present differently and therefore imagine—and work towards—different futures. It is often said to be the "queen" or "mother" of the social sciences. It is the basis of all subjects of study which fall under the category of Humanities and Social Sciences. It is also the basis of the study of philosophy, politics, economics and even art and religion. No wonder, it is considered an indispensible subject in the complete education of man.
