## Sports Competition

The University provides opportunities for sports and games, which are crucial in a student's development. While academic success requires diligent study, engaging in sports and games is equally essential for overall health and vitality. A balanced approach to student life includes both academic pursuits and participation in sports and activities. Participating in sports not only relieves mental fatigue but also enhances physical well-being. It complements academic learning, providing a holistic education that prepares students not just for exams but also for life beyond classrooms.
