INTRODUCTION

The existence of any Alumni Association is an extension of the brilliance and academic reflection of its own organization. It is helpful in the growth and expansion of the organization in the same way as fertilizer and water in the development of a plant. As a good product of the institution, they contribute mutually in increasing the educational, economic and social quality of the society. In today's digital age, where the world is rapidly progressing in every field, there is a lot of contribution from the educational institutions and students who have studied in them. Just as the institution has transformed its students into a quality social product, in the same way its students are also participating in social development by ensuring social contribution. Therefore, the contribution of the institution and its students is very important in the development of a good society because both are important parts of the society. To further strengthen and deepen these relations, each organization forms its own Alumni Association, under which various educational, social, research activities etc. are organized. Keeping this in view, alumni association is formed in Dr. Bhimrao Ambedkar University which will perform work for the following purposes
