## Solar Energy

The university's commitment to sustainable development shines through its integration of solar power systems into its infrastructure. A substantial portion of the power demand is met by the energy generated through solar cells. It's imperative to minimize reliance on conventional energy sources and transition towards renewable resources. Currently, the university boasts two different capacities of solar cells, producing 60 kWh at the Khandari Campus and 70 kWh at the Challesar Campus.

## University Solar Energy System

**Solar Power System  
University Campus – 60KWh**
