Solid Waste Management

The University upholds stringent waste management protocols by implementing a system of three separate dustbins in every hostel, department, and administrative block. Each bin is designated for specific types of waste: one for biodegradable waste, another for non-biodegradable waste, and a third for chemical waste. This meticulous segregation facilitates the proper collection of garbage, ensuring that each type of waste is appropriately handled. Subsequently, the collected waste is transported to the municipal corporation in Agra for disposal in accordance with established regulations.
