# Subject prerequisites:

- 1. To study Botany, a student must have had the subject Biology/Biotechnology learnt at 10+2 level.
- 2. Keen interest in plants and plant-related research, Potential in mathematics, biology and chemistry
- 3. Skills and aptitude for scientific study and research
- 4. Creativity and good comprehension while working on scientific procedures and research
- 5. Computer aptitude.

# **COURSE INTRODUCTION**

The new curriculum of B.Sc. in Science (Botany) offers essential knowledge and technical skills to study plants in a holistic manner. Students would be trained in all areas of plant biology using a unique combination of core, elective and vocational papers with significant inter-disciplinary components.

Students would be exposed to cutting-edge technologies that are currently used in the study of plant life forms, their evolution and interactions with other organisms within the ecosystem. Students would also become aware of the social and environmental significance of plants and their relevance to the national economy.

B.Sc. Botany Programme covers academic activities within the classroom sessions along with practical concepts at laboratory sessions. Infield, outstation activities and projects are also required to be organized for real-life experience and learning.

Candidates who have curiosity in plants kingdom, ecosystem, love exploring exotic places and wish to work as researchers or professions like Botanist, Conservationist, Ecologist, etc. can choose B.Sc. Botany course.

# Programme outcomes (POs):

Transformed curriculum shall develop educated outcome-oriented candidature, fostered with discoverylearning, equipped with practice & skills to deal practical problems and versed with recent pedagogical trends in education including e-learning, flipped class and hybrid learning to develop into responsible citizen for nation-building and transforming the country towards the future with their knowledge gained in the field of plant science.

	d of plant science.
<b>PO 1</b>	CBCS syllabus with a combination of general and specialized education shall introduce the
	concepts of breadth and depth in learning
PO2	Shall produce competent plant biologists who can employ and implement their gained
	knowledge in basic and applied aspects that will profoundly influence the prevailing paradigm
	of agriculture, industry, healthcare and environment to provide sustainable development.
<b>PO 3</b>	Will increase the ability of critical thinking, development of scientific attitude, handling of
	problems and generating solutions, improve practical skills, enhance communication skill,
	social interaction, increase awareness in judicious use of plant resources by recognizing the
	ethical value system.
<b>PO 4</b>	The training provided to the students will make them competent enough for doing jobs in
	Govt. and private sectors of academia, research and industry along with graduate preparation
	for national as well as international competitive examinations, especially UGC-CSIR NET,
	UPSC Civil Services Examination, IFS, NSC, FCI, BSI, FRI etc.
PO 5	Certificate and diploma courses are framed to generate self- entrepreneurship and self-
	employability, if multi exit option is opted.
<b>PO 6</b>	Lifelong learning be achieved by drawing attention to the vast world of knowledge of plants
	and their domestication.

# Programme specific outcomes (PSOs): B.Sc. I Year / Certificate course in Microbial Technology & Classical Botany

This Programme imparts knowledge on various fields of plant biology through teaching, interactions and practical classes. It shall maintain a balance between the traditional botany and modern science for shifting it towards the frontier areas of plant sciences with applied approach. This syllabus has been drafted to enable the learners to prepare them for self-entrepreneurship and employment in various fields including academics as well as competitive exams. Students would gain wide knowledge in following aspects: 1. Diversity of plants and microbes, their habitat, morphology, architecture and reproduction.

2. Plant disease causing microbes, symptoms & control.

3. Economic value of plants and their use in Human Welfare.

**Programme specific outcomes (PSOs):** B.Sc. II Year/ (Diploma in Plant Identification, Utilization & Ethnomedicine)

This course provides a broad understanding of identifying, growing and using plants. This course is primarily aimed to introduce people to the richness of plant diversity found in surrounding areas. Lecture sessions are designed to cover fundamental topics concerning classification of plants and their utilization required for understanding the flora and vegetation. Practical sessions are organized following theory for easy understanding of the various parts of the plants, structural organization of floral parts and diversity therein. Participants are taken to different locations covering a variety of habitats and forest types to acquaint them with the native flora. in the long run, will contribute towards building momentum for

people's participation in environmental conservation without compromising on academic rigor and our rich wealth of knowledge inherited over generations.

- 1. The course will cover conventional topics in Field Botany like Evolutionary History & Diversity of plants, Complete Morphology, Nomenclature of plants, Systems of Classification, Keys to important Families of Flowering Plants, Field Data Collection & Herbarium Techniques.
- 2. The course is designed to become a commercial crop grower, florist, protected cultivator, green belt plant advisor to industries, pharmacologist & taxonomist.

# Programme specific outcomes (PSOs): B.Sc. III Year / Bachelor of Science

The learning outcomes of a three years graduation course are aligned with programme learning outcomes but these are specific to-specific courses offered in a program. The core courses shall be the backbone of this framework whereas discipline electives, generic electives and skill enhancement courses would add academic excellence in the subject together with a multi-dimensional and multidisciplinary approach.

1. Understanding of plant classification systematics, evolution, ecology, developmental biology, physiology, biochemistry, plant interactions with microbes and insects, morphology, anatomy, reproduction, genetics and molecular biology of various life-forms.

2. This course is suitable to produce expertise in conservation biology like ex-situ conservation, response to habitat change, genotype characterization and reproductive biology.

3.Understanding of various analytical techniques of plant sciences, use of plants as industrial resources or as a human livelihood support system and is well versed with the use of transgenic technologies for basic and applied research in plants.

4. Understanding of various life forms of plants, morphology, anatomy, reproduction, genetics, microbiology, molecular biology, recombinant DNA technology, transgenic technology and use of bioinformatics tools and databases and the application of statistics to biological data.

**5.** Entrepreneurship Skill Development, Understand the issues of environmental contexts and sustainable development, Inculcation of human values,

6. Strengthen mathematical and computational skills. Enable students to use ICT & AI effectively.

7. Develop good skills in the laboratory such as observation and evaluation by the use of modern tools and technology.

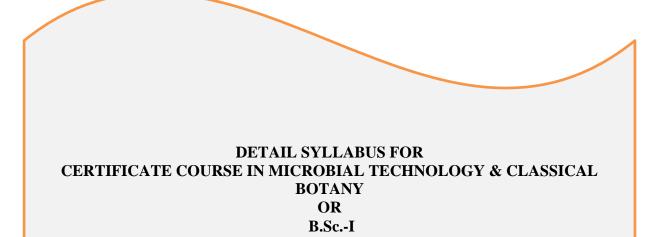

<ul> <li>PSO 1</li> <li>Understanding the nature and basic concepts of all the plant groups, their metabolism, components at the molecular level, biochemistry, taxonomy and ecology. The course will make them aware of natural resources and the environment and the importance of conserving it. Hands-on training in various fields will develop practical skills, handling equipment and laboratory use along with collection and interpretation of biological materials and data. Knowledge gained through theoretical and lab-based experiments will generate technical personnel in various priority areas such as genetics, cell and molecular biology, plant systematics and biotechnology.</li> </ul>
--

PSO 2	Botanists are able to contribute to all these fields and therefore, are mainly employed with educational institutions, government or public sectors or companies in industries, such as agriculture or forestry, oil, chemical, biotechnology, geological survey, environmental protection, drugs, genetic research, plant resources laboratories, plant health inspection services, lumber and paper, food, fermentation, nursery, fruit and so on. Jobs available as a botanist: •Microbiologist, plant pathologist, Taxonomist • Plant Physiologist • Plant Biochemist • Researcher • Mycologist • Ecologist • Weed Scientist • Palaeobotanist • Conservationist • Fruit Grower • Morphologist • Cytologist • Ethnobotanist • Plant geneticists etc.
PSO 3	Inculcate strong fundamentals on modern and classical aspects of Botany, understand knowledge of Botany is an essential pre-requisite for the pursuit of many applied sciences. It will facilitate students for taking up and shaping a successful career in Botany and allied sciences.
PSO 4	Introduction of research project will inculcate research aptitude and passion for higher education and scientific research.

I	A. Introduction to Indian ancient, Vedic and heritage Botany and contribution of Indian Botanists, in context with the holistic development of modern science and technology, has to be taught, practiced and assessed via class interaction/ assignments / self-study mentioned under Continuous Internal Evaluation (CIE).	
	<b>B. Microbial Techniques &amp; instrumentation</b> Microscopy – Light, phase contrast, electron, scanning and transmission electron microscopy, staining techniques for light microscopy, sample preparation for electron microscopy. Common equipment of microbiology lab and principle of their working – autoclave, oven, laminar air flow, centrifuge. Colorimetry and spectrophotometry, immobilization methods, fermentation and fermenters.	8
Π	<ul> <li>Microbial world</li> <li>Cell structure of Eukaryotic and prokaryotic cells, Gram positive and Gram-negative bacteria, Structure of a bacteria; Bacterial Chemotaxis and Quorum sensing, Bacterial Growth curve, factors affecting growth of microbes; measurement of growth; Batch culture, fed batch culture and continuous culture; Synchronous growth of microbes; Sporulation and reproduction and recombination in bacteria.</li> <li>Viruses, general characteristics, viral culture, Structure of viruses, Bacteriophages, Structure of T4 &amp;, λ-phage; Lytic and Lysogenic cycles, viroid, Prions &amp; mycoplasma &amp; phytoplasma, Actinomycetes &amp; plasmids and their economic uses.</li> </ul>	8
III	PhycologyRange of thallus organization in Algae, Pigments, Reserve food –Reproduction - Classification and life cycle of –Nostoc, Chlorella, Volvox, Hydrodictyon, Oedogonium, Chara; Sargassum, Ectocarpus, Polysiphonia.Economic importance of algae - Role of algae in soil fertility- biofertilizer – Nitrogen fixation- Symbiosis; Commercialproducts of algae –biofuel, Agar.	7
IV	Mycology General characteristics, nutrition, life cycle, Economic importance of Fungi, Classification upto class. Distinguishing characters of Myxomycota: General characters of Mastigomycotina, Zygomycota: <i>Rhizopus</i> , Ascomycota: <i>Saccharomyces, Penicillium, Peziza</i> . Basidiomycotina: Ustilago, Puccinia, Agaricus; Deuteromycotina: Fusarium, Alternaria. Heterothallism, Physiological specialization, Heterokaryosis & Parasexuality.	7
V	Mushroom Cultivation, Lichenology & Mycorrhiza           Mushroom cultivation.         General account of lichens, reproduction and significance; Mycorrhiza: ectomycorrhiza and endomycorrhiza and their significance.	7
VI	Plant Pathology Disease concept, Symptoms, Etiology & causal complex, Primary and secondary inoculum, Infection, Pathogenicity and pathogenesis, Koch's Postulates. Mechanism of infection (Brief idea about Pre-penetration, Penetration and Post- penetration), Disease cycle (monocyclic, polycyclic and polyetic). Defense mechanism with special reference to Phytoalexin, Resistance- Systemic acquired and Induced systemic fungicides- Bordeaux mixture, Lime Sulphur, Tobacco decoction, Neem cake & oil	7
VII	Diseases and Control         Symptoms, Causal organism, Disease cycle and Control measures of – Early & Late Blight of Potato, False Smut of Rice/ Brown spot of rice, Black Stem Rust of Wheat, <i>Alternaria</i> spot' and 'White rust of Crucifers, Red Rot of Sugarcane, Wilting of Arhar, Mosaic diseases on tobacco and cucumber, yellow vein mosaic of bhindi; Citrus Canker, Little leaf of brinjal; Damping off of seedlings, Disease management: Quarantine, Chemical, Biological, Integrated pest disease management	8

VII	I	Applied Microbiology Food fermentations and food produced by microbes, amino acids, Production of antibiotics, enzymes, vitamins, alcoholic beverages, organic acid & genetic recombinant vaccines. Mass production of bacterial biofertilizers, blue green algae, <i>Azolla</i> and <i>mycorrhiza</i> . Plant growth promoting rhizobacteria & biopesticides— <i>Trichoderma sp.</i> and <i>Pseudomonas</i> , Single cell proteins, Organic farming inputs, Microbiology of water, Bioploymers, Bioindicators, biosensors, Bioremediation, Production of biofuels, biodegradation of pollutants and biodeterioration of materials & Cultural Property.	8

## CERTIFICATE COURSE IN MICROBIAL TECHNOLOGY & CLASSICAL BOTANY / B.Sc.-I

Programme: Certificate Course In Microbial Technology & Classical Botany	Year: I	Semester: I/Paper-II
--	---------	----------------------

Subject: Botany	
-----------------	--

Course Code: B040102P	Course Title: Techniques in Microbiology & Plant Pathology
Course outcomes: After the completion of the course the students will b	be able:
1. Understand the instruments, techniques, lab etiquettes and go	ood lab practices for working in a microbiology

- nicrobiology laboratory.
- 2. Develop skills for identifying microbes and using them for Industrial, Agriculture and Environment purposes.
- 3. Practical skills in the field and laboratory experiments in Microbiology & Pathology.
- 4. learn to identify Algae, Lichens and plant pathogens along with their Symbiotic and Parasitic associations.
- 5. Can initiate his own Plant & Seed Diagnostic Clinic
- Can start own enterprise on microbial products 6

1.	INSTRUMENTS & TECHNIQUES	
1.	1. Laboratory safety and good laboratory practices	7
	2. Principles and application of Laboratory instruments-microscope, incubator,	
	autoclave, centrifuge, LAF, filtration unit, shaker, pH meter.	
	3. Buffer preparation & titration	
	3. Cleaning and Sterilization of glasswares	
	4. Preparation of media- Nutrient Agar and Broth	
	5. Inoculation and culturing of bacteria in Nutrient agar and nutrient broth	
	6. Preparation of agar slant, stab, agar plate	
	7. Phenol Coefficient method to test the efficacy of disinfectants	
II	BACTERIAL IDENTIFICATION	
	1. Isolation of bacteria.	
	2. Identification of bacteria.	8
	3. Staining techniques: Gram's, Negative, Endospore, Capsule and Cell Wall.	
	4. Cultural characteristics of bacteria on NA.	
	5. Pure culture techniques (Types of streaking).	
	6. Biochemical characterization:	
	IMViC, Carbohydrate fermentation test, Mannitol motility test, Gelatin liquefaction test, Urease test,	
	Nitrate reduction test, Catalase test, Oxidase test, Starch hydrolysis, Casein hydrolysis.	
TTT	MYCOLOGICAL STUDY:	
III	1. Isolation of different fungi: Saprophytic, Coprophilous, Keratinophilic.	8
	2. Identification of fungi by lactophenol cotton blue method. Rhizopus, Saccharomyces,	
	Penicillium, Peziza, Ustilago, Puccinia; Fusarium, Curvularia, Alternaria.	
	3. <i>Agaricus</i> : Specimens of button stage and ful grown mushroom; Sectioning of gills of <i>Agaricus</i> .	
	4. Lichens: crustose, foliose and fruticose specimens.	
** *	PHYCOLOGY:	
IV	1. Type study of algae and Cyanobacteria – Spirullina, Nostoc.	
	Chlorophyceae - Chlorella, Volvox, Oedogonium, Cladophora, and Chara; Xanthophyceae -	7
	Vaucheria; Bacillariophyceae – Pinnularia Phaeophyceae – Sargassum Rhodophyceae - Polysiphonia	
<b>X</b> 7	EXPERIMENTAL PLANT PATHOLOGY	
V	1. Preparation of fungal media (PDA) & Sterilization process.	8
	2. Isolation of pathogen from diseased leaf.	
	Identification: Pathological specimens of Brown spot of rice, Bacterial blight of rice, Loose smut of	
	wheat, Stem rot of mustard, Late blight of potato; Slides of uredial, telial, pycnial & aecial stages of	
	<i>Puccinia</i> , Few viral and bacterial plant diseases.	
	PRACTICALS IN APPLIED MICROBIOLOGY-1	
VI	1. Isolation of nitrogen fixing bacteria from root nodules of legumes.	8
	<ol> <li>Enumeration of rhizosphere to non rhizosphere population of bacteria.</li> </ol>	Ŭ
	<ol> <li>Isolation of antagonistic Pseudomonas from soil.</li> </ol>	
	<ol> <li>A. Microscopic observations of root colonization by VAM fungi.</li> </ol>	
	<ol> <li>Isolation of Azospirillum sp. from the roots of grasses.</li> </ol>	
	<ul><li>6. Isolation of phyllosphere microflora.</li></ul>	
	<ul><li>7. Isolation of P solubilizing microorganisms.</li></ul>	
	PRACTICALS IN APPLIED MICROBIOLOGY-2	
VII		8
	<ol> <li>Wine production.</li> <li>Isolation of lactic acid bacteria from curd.</li> </ol>	0
	4. Immobilized bacterial cells for production of hydrolytic enzymes.	
	5. Enzyme production and assay – cellulase, protease and amylase.	
	6. Immobilization of yeast.	
	7. Isolation of cellulolytic and anaerobic sulphate reducing bacteria.	
	8. Isolation and characterization of acidophilic, alkalophilic and halophilic bacteria.	
VIII	1. Cultivation of Spirulina, & Chlorella in lab for biofuel	
T ALL	2. Visit to NBAIM, Mau, Varanasi (Kashi)/ IMTECH (Institute of Microbial Technology),	6
	Chandigarh for viewing Culture Repository	
	3. Visit to biofertilizers and biopesticides unit to understand about the Unit operation procedures	
	4. Mushroom cultivation for Protein	1

This course can be opted as an elective by the students of following subjects: O <u>B.Sc</u> . Biotech, <u>B.Sc</u> . Microbiology, B.Sc. Agriculture, B.A. (Curators), B.A. Archa				
Suggested Continuous Evaluation Methods:				
Continuous Internal Evaluation shall be based on allotted Assignment and Class Tes	ests. The marks shall be as follows	5:		
Internal Assessment Marks				
Class Interaction	5			
Quiz	5			
Seminar 7				
Ainor field work/excursion/lab visit/technology dissemination etc.	8			

Course prerequisites: Qualification: To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Microbiology/biomedical Science. Facilities: Smart and Interactive Class Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts Lab Requisites: Microscopes, Stains, Dissection box, Haemocytometer, Specimens, Permanent slides, Autoclave, incubator, Oven, laminar flow cabinet, balances, Fermenter, Anaerobic jar and Spectrophotometer.

Programme /Class: B.ScI/ Certificate Course	e In	Year: I	Semester: II	
Microbial Technology & Classical Botany Paper-I				
Subject: Botany				
Course Code: B040201T	Cou	rse Title: Archegoniates	and Plant Architecture	
Course outcomes:				
After the completion of the course the students v	will be	able to:		
1. Develop critical understanding on morphol	logy, aı	natomy and reproduction of	f Bryophytes, Pteridophytes and	
Gymnosperms				
2. Understanding of plant evolution and their	transit	ion to land habitat.		
3. Understand morphology, anatomy, reprodu	action a	and developmental change	s therein through typological study and	
create a knowledge base in understanding the basis	of plan	t diversity, economic valu	es & taxonomy of plants	
4. Understand the details of external and internal structures of flowering plants.				
Credits: 4		С	ore Compulsory	
Max. Marks: 25+75 Min. Passing Marks:				
Total No. of Lectures-Tutorials-Practical (in hours per week): <b>4-0-0</b>				

Unit	Торіс	Lectures
		(60hrs)
Ι	Introduction to Archegoniates & Bryophytes Unique features of archegoniates, Bryophytes: General characteristics, adaptations to land habit, Range of thallus organization. Classification (up to family), morphology, anatomy and reproduction of <i>Riccia, Marchantia , Anthoceros and Sphagnum</i> . (Developmental details not to be included). economic importance of bryophytes .	7
П	Pteridophytes           General characteristics, Early land plants ( <i>Rhynia</i> ). Classification (up to family) with           examples, Heterospory and seed habit, stelar evolution, economic importance of Pteridophytes.	8
III	GymnospermsClassification and distribution of gymnosperms; Salient features of Cycadales, Ginkgoales,Coniferales and Gnetales, their examples, structure and reproduction; economic importance	8
IV	Palaeobotany General account of Cycadofilicales, Bennettitales and Cordaitales; Geological time scale; Brief account of process of fossilization & types of fossils and study techniques ; Contribution of Birbal Sahni	8
V	Angiosperm Morphology (Stem, Roots, Leaves & Flowers, Inflorescence)Morphology and modifications of roots; Stem, leaf and bud. Types of inflorescences;flowers, flower parts, fruits and types of placentation; Definition and types of seeds.	7
VI	<b>Plant Anatomy:</b> Meristematic and permanent tissues, Organs (root, stem and leaf). Apical meristems & theories on apical organization - Apical cell theory, Histogen theory, Tunica - Corpus theory. Secondary growth - Root and stem- cambium (structure and function) annular rings, Anomalous secondary growth - <i>Bignonia, Boerhaavia, Dracaena,Nyctanthes</i>	7
VII	<b>Reproductive Botany</b> Plant Embryology, Structure of microsporangium, microsporogenesis, , Structure of megasporangium and its types, megasporogenesis, Structure and types of female gametophyte, types of pollination, Methods of pollination, Germination of pollen grain, structure of male gametophyte, Fertilization, structure of dicot and monocot embryo, Endosperm, Double fertilization, Apomixis and polyembryony.	8
VIII	Palynology: Pollen structure, pollen morphology, pollen allergy, Applied Palynology: Basic concepts, Palaeopalynology, Aeropalynology, Forensic palynology, Role in taxonomic evidences.	7

## Suggested Readings:

Course Books published in Hindi may be prescribed by the Universities.

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture, B. Pharma, B.A. (Curators), B.A. Archaeology, B.A. Geology, BAMS

### Suggested Continuous Evaluation Methods:

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
Assignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8
	25

## **Course prerequisites:**

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 4 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry).

Facilities: Smart and Interactive Class ,wifi facility Other Requisites: : Videos,Books, CDs, Flora, Herbarium, Access to On-line resources, Display Charts

# Diploma in Plant Identification, Utilization & Ethnomedicine

Diploma in Plant Identification, Utilization & Ethnomedicine					
Programme /	Class: <i>Diploma in Plant Iden</i>	ification, Utilization & Ethnomedicine	Year: II	Semester: III Paper-I	
Subject: B	Sotany		I	Tuper I	
Course Co	ode: B040301T	Course Title: Flowering Plants Identif	ication & Aestheti	c Characteristics	
After the c 1. To gain classific 2. To learn 3. To com	<ul> <li>classification.</li> <li>2. To learn the major patterns of diversity among plants, and the characters and types of data used to classify plants.</li> <li>3. To compare the different approaches to classification with regard to the analysis of data.</li> </ul>				
5. To disco 6. For the	taxonomy of a major plant far	c resources, reference materials, herbari one can establish a nursery, Start a lands	um collections, pub	lications.	
Credits: 4		Core Compulsory			
Max. Mar	ks: <b>25</b> + <b>75</b>	Min. Passing Marks:			
	Total No. of Lectu	res-Tutorials-Practical (in hours per wee	k): <b>4-0-0</b>		
Unit		Торіс		No. of Lectures (60hrs)	
I	I Taxonomic Resources & Nomenclature Components of taxonomy (identification, nomenclature, classification) ; Taxonomic resources: Herbarium- functions & important herbaria, Botanical gardens, Flora, Keys- single access and multi-access. Principles and rules of Botanical Nomenclature according to ICN (ranks and names; principle of priority, binomial system; type method, author citation, valid- publication).				
Π	Types of classification & Evidences         Artificial, natural and phylogenetic. Bentham and Hooker (upto series),         Engler and Prantl (upto series) angiosperm phylogeny group (APG IV) classification.         Introduction to taxonomic evidences from palynology, cytology, phytochemistry &         Molecular biology data (Protein and Nucleic acid homology).			8	
III	Identification of Angiospermic families -I: (Families can be chosen University wise as per local available flora)8A study of the following families with emphasis on the morphological peculiarities and economic importance of its members (based on Bentham & Hooker's system) Ranunculaceae, Malvaceae, Rutaceae, Fabaceae, Myrtaceae , Cucurbitaceae, Rubiaceae, Asteraceae, Apocynaceae, Acanthaceae, Asclepiadaceae, Solanaceae.8				
IV	Identification of Angiospermic families -II: (Families can be chosen University wise as per local available flora)         A study of the following families with emphasis on the morphological peculiarities and economic importance of its members (based on Bentham & Hooker's system)-Amaranthaceae, Euphorbiaceae, Papaveraceae, Apiaceae, Lamiaceae, Orchidaceae, Liliaceae, Musaceae, Poaceae.				

V	Modern trends in Plant taxonomy: Brief idea on Phenetics, Biometrics, Cladistics (Monophyletic, polyphyletic and paraphyletic groups; Plesiomorphy and apomorphy).	8
VI	TOOLS & SOFTWARES IN PLANT IDENTIFICATION-GIS ( Mapping of (i) Patterns(ii) Features (iii) Quantities0P02.010H11YLIP - Free Phylogenetic Software,Digital Taxonomy (e-flora), Description Language for Taxonomy – DELTAInternet directory for botany.	7
VII	<b>Computer usage &amp; Android Applications</b> MS Office: PPT, Microsoft Excel, data entry, graphs, aggregate functions, formulas and functions, number systems, conversion devices, secondary storage media. GPS tagging, Plant Identification Apps.	7
VIII	Aesthetic Characteristics of Plants: Aesthetic characteristics of plants, English, Italian, French, Persian, Mughal and Japanese gardens; Features of a garden (Garden wall, Fencing, Steps, Hedge, Edging, Lawn, Trees, shrubs and shrubberies, climbers and creepers, rockery, Flower beds, Shrubbery, Borders, Water garden). Some Famous gardens of India. Conservatory, green houses, Indoor garden, Roof garden, Topiary, Bonsai.	8

	Any Other :						
	<b>Botanical Excursions:</b> One teacher along with a batch not more than 7 students be taken for botanical excursion to places of Botanical interest, one in each term. If there are female students in a batch of 7 students, one additional lady teacher is permissible for excursion.						
	Each excursion will not be more than SEVEN days during college working days. T.A. and D.A. for teachers and non-teaching staff participating in excursions should be paid as per rules. Tour report duly certified by tour in charge teacher and Head of the Department should be submitted at the time of practical examination. For every study tour take the prior permission of the head of the department and Principal.						
	For every study tour take the prior permission of the head of the department and Principal. The marks will be counted under Internal assessment and external assessment both.In external assessment student will have to present his excursion report along with industrial training/central labs visits and BSI or Museum visits.In internal assessment he shall have to label the campus plants with botanical details/develop herbal/floristic garden/conserve plants in botanical garden/contribute specimens via collection .						

j	A project supported along with photographs taken during field study to be submitted giving comprehensive idea about different types of inflorescence, flowers and fruits/ At least three field excursions at hills/Oceans/Deserts including one Compulsory excursion to Botanical Garden, FRI/BSI and Central National Herbarium (CNH). Central Research Institutes/Hot Spots

Course	e Code: B040401T	Course Title: Econo	mic Botany, Ethnomedicine	e and Phytochemistry	
1. Uno 2. Uno proo 3. kno plar	utcomes: er the completion of the course the stud derstand about the uses of plants –will derstand phytochemical analysis rela ducts produced by the plants w about the importance of Medicinal hts in our daily life and also about the dern times.	know one plant-on ted to medicinally l plants and its us	e employment y important plants and e eful parts, economically i	mportant	
	Credits: 4		Core Co	ompulsory	
	Max. Marks: 25+75		Min. Pass	sing Marks:	
	Total No. of Lectures-Tutorials	-Practical (in hours	per week): <b>4-0-0</b>		
Unit	Unit Topic No. of Lectures (60hrs)				
I	I       Origin and domestication of cultivated plants       7         Centers of diversity of plants, origin of crop plants. Domestication and introduction of crop plants.       7         Concepts of sustainable development; cultivation, production and uses of Cereals, legumes, Spices & beverages.       7				
П	II       Botany of oils, Fibers, timber yielding plants & dyes       7         Study of the plants with Botanical names, Family, part used, and economic uses yielding Edible       8         & essential oils; Sugar, Starch; Fibers; Paper, Fumitories & Masticatories, Rubber, Dyes, Timber, biofuel crops.       7			Edible	
III	Commercial production of Flowers, Vegetables, and fruits (To be Chosen area wise)       7         Commercial greenhouse cultivation of rose, Gerbera, Gladiolus, Anthurium/lilium/lily, tomato, bell pepper, cucumber, strawberry & Exotic leafy vegetables using Hydroponics.       7				
IV	IPR & Traditional Knowledge 8				
V       Ethnobotany         Methodologies of ethnobotanical research: Field work, Literature, Herbaria and Musea and other aspects of ethnobotany. Importance of ethnobotany in Indian systems of medicine (Siddha, Ayurveda and Unani), Role of AYUSH, NMPB, CI-MAP and CARI. Tribal knowledge towards disease diagnosis, treatment, medicinal plants, plant conservation and cultivation.       8			iddha, <b>8</b>		
VI				ect of	

	Plants in primary health care: common medicinal plants: <i>Tinospora, Acorus, Ocimum, Turmeric</i>		
<b>X</b> 7 <b>FX</b>	and <i>Aloe</i> . Indian Pharmacopeia, Quality Evaluation of crude drugs & adulteration	•	
VII	Pharmacognosy	8	
Preparation of drugs for commercial market - Organoleptic evaluation of drugs - Microscopic evaluation of drugs - Physical evaluation of drugs - Active and inert constituents of drugs - Classification of drug plants - individual drugs - drug adulteration. Sources of crude drugs -			
	organoleptic study of Adhatoda vasica, Andrographis paniculata, Azadirachta indica,		
	Coriandrum sativum, Datura metel, Eclipta alba, Emblica officinalis, Ocimum sanctum,		
	Phyllanthus amarus, Ricinus communis, Vinca rosea and Zingiber officinale.		
	Herbal Preparations & Phytochemistry :	7	
VIII	Collection of wild herbs - Capsules - compresses - Elixirs - Glycerites - Hydrotherapy or Herbal		
	bath - Herbal oils - Liquid extracts or Tincture - Poultices - Salves - Slippery elm slurry and gruel		
	- Suppositories - Teas. Plant natural products , general detection, extraction and characterization		
	procedures. Glycosides and Flavonoids and therapeutic applications. Anthocyanins and		
	Coumarins and therapeutic applications, Lignans, Terpenes, Volatile oils and Saponins,		
waaatad	Carotenoids and Alkaloids Carotenoids and pharmacological activities.		
uggested	Readings:

**This course can be opted as an elective by the students of following subjects: Open to all but special for** B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture, B. Pharma, B.A. (Curators), B.A. Archaeology, B.A. Geology, BAMS

## Suggested Continuous Evaluation Methods:

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
ssignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8
	25

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry).

Facilities: Smart and Interactive Class

Other Requisites: : Video collection, Books, CDs, Flora, Herbarium, Access to On-line resources, Display ChartsSuggested equivalent online resources:

Familiarize with at least 5 folk medicines and study th medicinal application. Observe the plants of ethnobotanical importance in ye	litional meth	od of treatr	ment using	7
			spital		

VI	Instrumentation and herbal Preparations				
	Develop Capsules of herbs/ Develop Herbal oils/ Develop Poultice/cream				
	Analyse some active ingredients using chromatography /Spectrophotometry				
VII					
	Organoleptic studies of plants mentioned in the theory :				
	1. Morphological studies of vegetative and floral parts.				
	2. Microscopic preparations of root, stem and leaf.				
	3. Stomatal number and stomatal index.				
	4. Vein islet number.				
	5. Palisade ratio.				
	6. Fibres and vessels (maceration).				
	7. Starch test				
	8. Proteins and lipid test				
	Phytochemistry:		7		
VIII	Determination of the percentage of foreign leaf in a drug compo				
	Dimensions of Calcium oxalate crystals in powdered crude dru				
	Preliminary phytochemical tests for alkaloids, terpenoids, glyco	osides, volatile oils, tannins			
	& resins.				
~	Any 5 herbal preparations.

# **BACHELOR OF SCIENCE (BOTANY)**

Programme/Class: <i>Bachelor of Science</i>	Year: III	Semester: V Paper-I			
Subject: BOTANY					
Course Code: B040501T Course Title: Plant Physiology, Metabolism & Biochemis					

## **Course outcomes:**

After the completion of the course the students will be able to:

1. Understand the role of Physiological and metabolic processes for plant growth and development.

2. Learn the symptoms of Mineral Deficiency in crops and their management.

3. Assimilate Knowledge about Biochemical constitution of plant diversity.

4.Know the role of plants in development of natural products, nutraceuticals, dietary supplements, antioxidants

	Credits: 4	Core Compulsory		
Max. Marks: 25+75 Min. Passing Mark			:	
	Total No. of Lectures-Tutorials-Practical (	in hours per week) 4-0-0		
Unit	Торіс	No. of Lectures(60hrs)		
Ι	<ul> <li>Plant water relation, Mineral Nutrition, Transpiratio</li> <li>Importance of water, water potential and its component</li> <li>Factors affecting transpiration; Root pressure and guttati</li> <li>Criteria of essentiality of elements; Role of essential element</li> <li>in major crops,</li> <li>Transport of ions across cell membrane, active and pass</li> <li>sap, girdling experiment; Pressure flow model.</li> </ul>	7		
Π	Carbon Oxidation Krebs cycle, Glycolysis, fate of pyruvate- aerobic and an regulation of glycolysis, oxidative pentose phosphate p pyruvate, regulation of Krebs cycle, mitochond phosphorylation, ATP-Synthetase, Chemiosmotic mec respiration, factors affecting respiration.	7		
III	<b>Nitrogen Metabolism</b> Nitrate assimilation, biological nitrogen fixation (exam Physiology and biochemistry of nitrogen fixation, A reductive amination and transamination, amino acid synt	8		
IV	Lipid Metabolism & Photosynthesis Lipid Metabolism: Synthesis and breakdown of trigly gluconeogenesis and its role in mobilization of lipids du Photosynthesis: Pigments, Action spectra and Enhancer and Photophosphorylation, C3 & C4 photosynthesis, CA	7		
V	Plant Development, Movements, Dormancy & Respon Developmental roles of Phytohormones (auxins, gibbere autonomic & paratonic movements, Control and Coordin (SDP, LDP, Day neutral plants); Phytochrome (discover responses on photomorphogenesis, Seed physiology & D Senescence	8		

VI	BiomoleculesCarbohydrates: Nomenclature and classification; Role of monosaccharides (glucose, fructose, sugar alcohols – mannitol and sorbitol); Disaccharides(sucrose, maltose, lactose), Oligosaccharides and polysaccharides (structural-cellulose, hemicelluloses, pectin, chitin, mucilage; storage – starch, inulin).Lipids: Storage lipids: Fatty acids structure and functions, Structural lipids: Phosphoglycerides; Lipid functions: cell signals, cofactors, prostaglandins, Introduction of lipid micelles, monolayers, bilayers	8
VII	<b>Proteins</b> : Structure of amino acids; Peptide bonds; Levels of protein structure-primary, secondary, Ramchandran plot,tertiary and quaternary; Isoelectric point; Protein denaturation and biological roles of proteins <b>Nucleic acids</b> : Structure of nitrogenous bases; Structure and function of nucleic acids,Nucleic acid denaturation &Re-naturation, MiRNA	7
VIII	<b>Enzymes:</b> Structure of enzyme: holoenzyme, apoenzyme, cofactors, coenzymes and prosthetic group; mechanism of action (activation energy, lock and key hypothesis, induced- fit theory), enzyme inhibition and factors affecting enzyme activity, Allosteric enzymes & Abzymes. Phytonutrients, Nutraceuticals, dietary supplements and antioxidants.	8

Max. Marks: 25+75			Min. Passing Marks:			
	Total No. of Lectures-Tuto	orials-Pra	ctical (in hours per week) 4-	)-0		
Unit	Торіс			No. of Lectures(60hrs)		
I	I Genetic material Miescher to Watson and Crick- historic perspective, Griffith's and Avery's transformation experiments, Hershey-Chase, bacteriophage experiment, DNA structure, types of DNA, types of genetic material. DNA replication (Prokaryotes and eukaryotes): semi- conservative. DNA replication (Prokaryotes and eukaryotes): bidirectional replication, semi- conservative, semi discontinuous RNA priming, Ø (theta) mode of replication, replication of linear, dsDNA, replicating the 5 end of linear chromosome including replication enzymes.					

II	<b>Transcription &amp; Regulation of gene expression</b> Types of structures of RNA (mRNA, tRNA, rRNA), RNA polymerase- various types;	7
	Translation, (Prokaryotes and eukaryotes), genetic code. Regulation of gene expression in Prokaryotes: Lac operon and Tryptophan operon; and in Eukaryotes	
ΙШ	<b>Principles &amp; Techniques of genetic engineering</b> Blotting techniques: Northern, Southern and Western Blotting, DNA Fingerprinting; Molecular DNA markers i.e. RAPD, RFLP, SNPs; DNA sequencing, PCR and Reverse Transcriptase-PCR. Hybridoma and monoclonal antibodies, ELISA and Immunodetection. Antibody Engineering.	8
IV	Applications of Genetic engineering Pest resistant (Bt-cotton); herbicide resistant plants (RoundUp Ready soybean); Transgenic crops with improved quality traits (Flavr Savr tomato, Golden rice); Improved horticultural varieties (Moondust carnations); Role of transgenics in bioremediation (Superbug); Industrial enzymes (Aspergillase, Protease, Lipase); Genetically Engineered Products, Biosafety concerns	7
V	<b>Bioinformatics &amp; its applications</b> Computer fundamentals - programming languages in bioinformatics, role of supercomputers in biology. Historical background. Scope of bioinformatics - Genomics, Transcriptomics, Proteomics, Metabolomics, Molecular Phylogeny, computer aided Drug Design (structure based and ligand based approaches), Systems Biology and Functional Biology. Applications and Limitations of bioinformatics.	8
VI	<b>Biological databases :</b> Introduction to biological databases - primary, secondary and composite databases, NCBI, nucleic acid databases (GenBank, EMBL, DDBJ, NDB), protein databases (PIR, Swiss-Prot, TrEMBL, PDB), metabolic pathway database (KEGG, EcoCyc, and MetaCyc), small molecule databases (PubChem, )	8
VII	Data Generation and Data Retrieval Generation of data (Gene sequencing, Protein sequencing, Mass spectrometry, Microarray), Sequence submission tools (BankIt, Sequin, Webin); Sequence file format (flat file, FASTA, GCG, EMBL, Clustal, Phylip, Swiss-Prot); Sequence annotation; Data retrieval systems (SRS, Entrez)	7
VIII	<ul> <li>Phylogenetic analysis</li> <li>Similarity, identity and homology, Alignment – local and global alignment, pairwise and multiple sequence alignments, alignment algorithms. Methods of Alignment (Dot matrix, Dynamic Programming, BLAST and FASTA);</li> <li>Phylogenetic analysis: Construction of phylogenetic tree, dendrograms, methods of construction of phylogenetic trees.</li> </ul>	8

	2. Separation of amino acids by paper chromatography.	
	3. Detection of organic acids: citric, tartaric, oxalic and malic from laboratory	
	samples.,	
	4. Qualitative Analysis of carbohydrates,	
	5. Estimation of reducing sugar by anthrone method,	
	6. Qualitative Analysis of Lipids	
	7. Qualitative analysis of Amino acids and Proteins	
	8. Quantitative Analysis of Nucleic Acids,	
	9. Analysis of dietary supplements, nutraceuticals & antioxidants	
	10. Testing of adulterants in food items.	
V	Genetic material	7
	1. Instruments and equipments used in molecular biology.	
	2. Preparation of LB medium and cultivating E.coli on it.	
	3. Isolation of Genomic DNA	
	4. Isolation of DNA from plants	
	5. Examination of the purity of DNA by agarose gel electrophoresis.	
	6. Quantification of DNA by UV-spectrophotometer	
	7. Estimation of DNA by diphenylamine method.	
	7. Estimation of DTVT by diphenylamine method.	
VI	Preparation of models/ charts:	
	1. Study of experiments establishing nucleic acid as genetic material (Avery et al,	
	Griffith's, Hershey & Chase's and Fraenkel & Conrat's experiments)through	7
	photographs	
	2. Numericals based on DNA re-association kinetics (melting profiles and Cot	
	curves)	
	3. Study of DNA replication through photographs: Modes of replication - Rolling	
	circle, Theta and semi-discontinuous ; Semiconservative model of replication	
	(Messelson and Stahl's experiment); Telomerase assisted end-replication of linear	
	DNA	
	4. Study of structures of : tRNA (2D and 3D); prokaryotic RNA polymerase and	
	eukaryotic RNA polymerase II through photographs	
	5. Study of the following through photographs: Assembly of Spliceosome	
	machinery; Splicing mechanism in group I & group II introns; Ribozymes and	
	Alternative splicing	
	6. Understanding the regulation of lactose (lac) operon (positive & negative	
	regulation) and tryptophan (trp) operon (Repression and De-repression &	
	Attenuation) through photographs.	
	7. Understanding the mechanism of RNAi by photographs	
VII	Genetic Engineering	_
	1. Isolation of protoplasts.	7
	2. Construction of restriction map of circular and linear DNA from the data	
	provided.	
	3. Isolation of plasmid DNA.	
	4. Restriction digestion and gel electrophoresis of plasmid DNA (demonstration/	
1	photograph).	
	5. Calculate the percentage similarity between different cultivars of a species	

	6. Agarose gel analysis of plasmid DNA	
	7. Restriction digestion of plasmid DNA -Demonstration of PCR	
	Applications of Genetic engineering	7
	1. ELISA Test,	-
VIII	2. Viability tests of cells	
	3. Study of methods of gene transfer through photographs: Agrobacterium-	
	mediated, direct gene transfer by electroporation, microinjection, microprojectile	
	bombardment.	
	4. Study of steps of genetic engineering for production of Bt cotton, Golden rice,	
	FlavrSavr tomato through photographs.

	Total No. of Lectures-Tuto	rials-Practical (in hours	per week): <b>4-0-0</b>	
Unit	Т	opic	-	No. of Lectures (60hrs)
	Structure and function of cell wall, plasn golgi apparatus, mitochondria, chloropla: Organization of nucleus: nuclear envelope Chromosomal nomenclature- chromatic constriction.Organization of chromosom classification. Lampbrush chromosomes idiogram.Cell cycle: G0, G1, S and G2 pha meiosis. Variation in Chromosome nu Euploidy-haploidy, polyploidy- significant inversion and translocation.	st, lysosomes, peroxiso , nucleoplasm and nucle ds, centromere, telom mes- Nucleic acid a s and polytene chron ases – mitosis: open and mber (Numerical aber	mes and cell inclusions - olus. ere, satellite, secondary nd histones- types and nosomes- Karyotype and closed mitosis – amitosis - rations)- anueploidy and	8
II	Genetics Chromosome theory of inheritance, crossin codominance; Interaction of Genes; Multip Polygenic inheritance; Extra-nuclear Inher determination and Sex chromosomes; Patt	ple alleles, Lethal alleles itance, Linkage, crossin	s, Epistasis, Pleiotropy, g over, Concept of sex	7
III	Plant breedingPlant introduction. Agencies of plant introduction in India, Procedure of introduction - Acclimatization – Achievements, Selection - mass selection, pure line selection and clonal selection. Genetic basis of selection methods, Hybridization: Procedure of hybridization, inter generic, inter specific, inter varietal hybridization with examples. Composite and synthetic varieties, Male sterility, Heterosis and its exploitation in plant breeding, Mutation, Molecular Breeding (use of DNA markers in plant breeding), achievements in India, Breeding for pest, pathogenic diseases and stress resistance.			8
IV	<b>Biostatistics:</b> Definition, statistical methods, basic limitations and uses of statistics. Biomet Frequency distribution- definition only, Median; Measurement of dispersion–Coef error of Mean; Test of significance: chi- so in biostatistics - MS Excel and SPSS	try: Data, Sample, Pop Central tendency– Ari fficient of variation, Sta	ulation, random sampling, thmetic Mean, Mode and ndard Deviation, Standard	7
V	Plant tissue culture			8

	Principles, components and techniques of <i>in vitro</i> plant cultures, Callus cultures, Cell culture,	
	cell suspension cultures, Embryogenesis and organogenesis, Protoplast isolation and culturing	
	of protoplast- principle and application, regeneration of protoplasts, protoplast fusion and	
	somatic hybridization- selection of hybrid cells, Somaclonal variation, Plant secondary	
	metabolites production.	
VI	Nanotechnology	-
1	Fundamentals of nanoscale self-assembly process involved in important functional	/
	biomolecules such as Nucleic acid (DNA and RNA), Proteins, Enzymes. Cell structure and	
	organelles, nanoscale assembly of cellular components (cell membrane and liposomes).	
	Nanoscale assembly of microorganisms (virus). Nano-particles synthesis, Biological	
	synthesis of Nanoparticles, Advantages and applications of biologically synthesized nanomaterials. Introduction to biological nanomaterials. Biomineralization, Magnetosomes,	
	nano-pesticides, nano-fertilizers, nano-sensors.	
VII	Artificial Intelligence in Plant Sciences	0
VII	Big Data Analytics, Blockchain Technology, 3-D Printing, Machine learning, Algorithms of Machine Learning, Expert systems and Fuzzy logic, Artificial Neural Networks and Genetic	8
	algorithms, Predictive Analytics, Agents and Robotics, IoT Sensors, Object Image capture &	
	analysis ; Applications of Artificial Neural Networks in Plant Science. Introduction to use of Digital technologies – AI, IoT & ICT in Botany	
VIII	Educational software- INFLIBNET, NICNET, BRNET, internet as a knowledge repository-	7
,	google scholar, science direct. resource management, weather forecasting. IoT Database	, '
	management, IoT platforms, IoT Graphical user interface • IoT application development for	
	Android Mobile phones, ICT Applications for different crops and horticulture

#### This course can be opted as an elective by the students of following subjects:

Open to all but special for B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture, B. Pharma, B.Sc. Food Science, B.A. (Curators), B.A. Geology.

**Suggested Continuous Evaluation Methods:** Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
Assignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8
	25

### **Course pre-requisites:**

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry/ Biotech/ Math/Statistics/Chemistry/ Computer Science)

**Facilities: Smart and Interactive Class** 

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts Suggested equivalent online courses:

https://www.cytology-iac.org/educational-resources/virtual-slide-library

https://www.asct.com/ASCTWeb/Content/Cytopreparation\_Online\_Course.aspx

https://www.mooc-list.com/tags/genetics

https://www.coursera.org/learn/genetics-evolution

https://www.my-mooc.com/en/mooc/introduction-to-genetics-and-evolution/

## **Further Suggestions:**

Access to Statistics, Chemistry, Math and Biotechnology resources will be required

Progr	camme/Class: Bachelor of Science	Year: III	Semester Paper-II			
	Subject: Botany					
Co	ourse Code: B040602T	Course Title: Ecology	& Environment			
1. 2. 3.	<ul> <li>Course outcomes:</li> <li>1. acquaint the students with complex interrelationship between organisms and environment;</li> <li>2. make them understand methods for studying vegetation, community patterns and process ecosystem functions, and principles of phytogeography.</li> </ul>					
	Credits: 4		Core Compulsory	y/Elective		
	Max. Marks: 25+75		Min. Pas	ssing Marks:		
	Total No. of Lectures-Tutor	rials-Practical (in hour	rs per week): <b>4-0-0</b>			
Unit	Т	opic		No. of Lectures (60 hrs)		
I	Natural resources & Sustainable uti management strategies; Restoration of management strategies, Ramsar sites Depletion, Biological Invasion, Ener- energy, Contemporary practices in re Resource Appraisal, Ecological Footpre Accounting.	7				
п	<ul> <li>Ecology &amp; Ecosystem</li> <li>Definition of Ecology, Ecological Factors, Positive and negative interactions. Ecosystem</li> <li>– Concept of an ecosystem-structure and function of an ecosystem.</li> <li>Abiotic and biotic com-Energy flow in an ecosystem</li> <li>Ecological Succession-Definition &amp; types. Processes and types (autogenic, allogenic, autotrophic, heterotrophic, primary &amp; secondary), Hydrosere and Xerosere.</li> <li>Food chains and food webs, Ecological pyramids, production and productivity;</li> <li>And components.</li> <li>Types of ecosystems: Forest Ecosystem, Grassland, Crop land, aquatic Ecosystems</li> <li>Ecological Adaptations – Hydrophytes, Xerophytes, Halophytes, Epiphytes and Parasites.</li> </ul>			8		
ш	Soil Formation, Properties & Conservation         Soil: Origin, Formation, composition, Soil types, Soil Profile, Soil Microorganisms, soil processes, Soil Erosion, Biogeochemical cycles, Soil Conservation: Biological– Contour farming, Mulching, Strip cropping, Terracing and Crop rotation. Mechanical–Basin Listing, Construction of dams, Watershed Management, Soil reclamation			7		
IV	<b>Biodiversity and its conservation:</b> Definition -genetic, species, and ecos ethical, aesthetic and option values; hotsp communities and populations, their endangered species of plants in India. Eco <i>Conservation of Biodiversity</i> :	7				
	Conservation of Biodiversity: Ex-situ and in-situ conservation, Red data book, botanical gardens, National park, Sanctuaries, hot & hottest spots and Bioreserves. Role of Seed Bank and Gene Bank Valuing plant resources, ecotourism, Role of NBPGR, FAO, BSI.					

V	<b>Phytogeography:</b> Biogeographic regions of India & world, Agroecological & Floristic zones of India. Natural vegetation of India, static and dynamic plant geography, basic principles governing geographical distribution of plants, Phytogeographical regions of India, Vegetational types in Uttar Pradesh.	7			
VI	Environmental audit & Sustainability				
	Concept of environmental audit; Guidelines of environmental audit; Methodologies adopted along with some industrial case studies; Environmental standards: ISO 14000 series; Scheme of labelling of environment friendly products (Ecomark); Life cycle analysis; Concept of energy and green audit, Strategies and debates on sustainable development; Concept of Sustainable Agriculture; India's environment action programme: issues, approaches and initiatives towards Sustainability; Sustainable development in practice.	8			
VII	<b>Pollution, Waste management &amp; Circular Economy</b> Environmental pollution, Environmental protection laws, Bioremediation, Activated Sludge Process (ASP) – Trickling Filters – oxidation ponds, fluidized bed reactors, membrane bioreactor, neutralization, ETP sludge management; digesters, up flow anaerobic sludge blanket reactor, fixed film reactors, sequencing batch reactors, hybrid reactors, bioscrubbers, biotrickling filters; regulatory framework for pollution monitoring and control; case study: Ganga Action Plan; Yamuna Action Plan; implementation of CNG ;Waste- Types , collection and disposal, Recycling of solid wastes (hazardous & non-hazardous) - classification, collection and segregation , Incineration, Pyrolysis and gasification , Sanitary landfilling ; composting, Biogas production ,Circular Economy & sustainability.	8			
VIII	<ul> <li>Environmental ethics, Carbon Credits &amp; Role of GIS</li> <li>Carbon credit: concept, exchange of carbon credits.</li> <li>Carbon sequestration, importance, meaning and ways.</li> <li>Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust.</li> <li>Wasteland reclamation. Consumerism and waste products.</li> <li>Clean development mechanism.</li> <li>Geographical Information Systems: definitions and components; spatial and non-spatial data; GIS software packages; GPS survey, data import, processing, and mapping.</li> <li>Applications and case studies of remote sensing and GIS in land use planning, forest resources &amp; agriculture studies.</li> </ul>	8

This course can be opted as an elective by the students of following subjects: Open to all but special for <u>B.Sc</u>. Biotech, <u>B.Sc</u>. Microbiology, B.Sc. Agriculture, B.A. (Curators), B.A. Archaeology, B.A. Geology

#### **Suggested Continuous Evaluation Methods:**

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
Assignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8
	25
Course prerequisites:	
Qualification: To study this course, a student must have qualified 10+2 with	
Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Fores	try/ Microbiology/Gardening /biomedical
Science. Facilities: Smart and Interactive Class	
Other Requisites: Video collection, Books, CDs, Access to On-line resou	rces. Display Charts
Suggested equivalent online courses:

II	Constig	
11	Genetics	
	1. Monohybrid cross (Dominance and incomplete dominance)	8
	2. Dihybrid cross (Dominance and incomplete dominance)	Ū
	3. Gene interactions (All types of gene interactions mentioned in the	
	syllabus)	
	a. Recessive epistasis 9: 3: 1.	
	b. Dominant epistasis 12: 3: I	
	c. Complementary genes 9: 7	
	d. Duplicate genes with cumulative effect 9: 6: 1	
	e. Inhibitory genes 13: 3	
	4. Observe the genetic variations among inter and intra specific plants.	
	5. Demonstration of Breeding techniques-Hybridization, case studies of	
	mutation, polyploidy, emasculation experiment.	
III	Biostatistics:	
	1. Univariate analysis of statistical data: Statistical tables, mean, mode,	7
	median, standard deviation and standard error (using seedling population /	
	leaflet size).	
	2.Calculation of correlation coefficient values and finding out the probability.	
	3.Determination of goodness of fit in Mendellian and modified mono-and	
	dihybrid ratios (3:1, 1:1, 9:3:3:1, 1:1:1:1, 9:7, 13:3, 15:1) by Chi-square	
	analysis and comment on the nature of inheritance.	
	3. Computer application in biostatistics - MS Excel and SPSS	
IV	Plant tissue culture	
	1. Familiarization of instruments and special equipments used in the plant	8
	tissue culture experiments	
	2. Preparation of plant tissue culture medium, and sterilization, Preparation of	
	stock solutions of nutrients for MS Media.	
	3.Surface sterilization of plant materials for inoculation (implantation in the	
	medium)	
	4. Micropropagation of potato/tomato/ - Demonstration	
	5. Protoplast isolation and culturing – Demonstration	
	Ecology & Environment	
V		8
	Epiphytes and Parasites	
	2. Study of morphological adaptations of hydrophytes and xerophytes	
	(four each).	
	3. Study of biotic interactions of: Stem parasite (Cuscuta), Root parasite	
	(Orobanche) Epiphytes, Predation (Insectivorous plants).	
	4. Observation and study of different ecosystems mentioned in the	
	syllabus.	
	5. Field visit to familiarize students with ecology of different sites	
VI	Soil Formation, Properties & Conservation	8
	1. Determination of pH of various soil and water samples (pH meter,	
	universal indicator/Lovibond comparator and pH paper)	
	2. Analysis for carbonates, chlorides, nitrates, sulphates, organic matter	
	and base deficiency from two soil samples by rapid field tests.	
	3. Determination of organic matter of different soil samples by Walkley	
	& Black rapid titration method.	
	4. Soil Profile study	
	5. Soil types of India-Map	
	Biodiversity and Phytogeography:	
VII	1. Study of community structure by quadrat method and determination	7
	of (i) Minimal size of the quadrat, (ii) Frequency, density and	
	abundance of components (to be done during excursion/field visit).	
	2. Marking of vegetation types of India, World & Uttar Pradesh on maps
