How to Publish Quality Research Work

April 18, 2025 at 1:00 pm

Publication of research work is a crucial step in disseminating research findings to the academic community and beyond. It involves sharing research results through various mediums, such as Peer-reviewed journals Articles undergo rigorous review by experts, Conferences in which presentations and proceedings showcase research, Books and chapters, where In-depth exploration of topics and Online repositories which is Open-access platforms for wide dissemination.

Publication promotes, knowledge sharing, validation, quality and credibility, collaboration, facilitating dialogue among researchers and Influencing policy, practice, and future research. For publication of the research work Researchers should consider factors like, Journal impact factor, Audience and relevance, Open-access options and Ethical publishing practices.

Various benefits of publication are enhanced visibility and recognition, contribution to academic and professional growth, facilitating critique and improvement and advancing research and innovation.

By publishing research, scholars can share their findings, engage with the community, and contribute to the advancement of knowledge in their field. Effective publication strategies can amplify research impact and reach.

Invited Speaker

Dr. Alpana Mathur

Desk Editor-Researcher Services, Taylor & Francis.

Email ID: alpana.mathur.in@informa.com

LinkedIn: <https://www.linkedin.com/in/dr-alpana-mathur-632b36150/>

Dr. Alpana holds a Ph.D. in Biochemistry from CSIR-Indian Institute of Toxicology Research, Lucknow. During her Ph.D., she published over ten research articles in high-impact SCI journals, making notable contributions to the fields of biochemical toxicology and molecular biology. Since 2022, Dr. Alpana has been associated with Taylor & Francis and currently serves as a Desk Editor with the Researcher Services team, based in Auckland, New Zealand. In this role, she manages a portfolio of biomedical journals, with a specialization in molecular biology, endocrinology, and medicine. As the handling editor, she oversees the peer review process, collaborates with international editorial boards, and ensures the timely and ethical progression of manuscripts. Throughout her academic career, Dr. Alpana has been the recipient of several prestigious scholarships and awards, including the UGC Postgraduate Merit Scholarship, the SFRBM Travel Award (Baltimore, USA), the Chancellor's Medal from the University of Lucknow for being the best student in science, and the Suggabibi Gold Medal for being the best woman student at the graduation level in Lucknow. Outside of her professional life, she enjoys listening to music, exploring culinary arts, and reading.
