

Activity Report Form

Name of Activity
Invited Talk On The Topic Softwares And Cryptology
Date of Activity
10/03/2025
Name of the Department
Department of Mathematics
Category of the activity
Invited talks
Brief Description of Activity
<p>Cryptology, the science of secure communication, is essential in software development. It includes cryptography (creating secure systems) and cryptanalysis (breaking them). Modern software uses cryptology for data protection, encryption, authentication, and secure communication. Cryptology is also crucial in cybersecurity, blockchain, and secure messaging apps. In short, cryptology ensures that software can safely handle sensitive information, also Cryptology together with recommendation discussed with many real life examples including, making placements easy, matrimonial apps, and election etc.</p>
